8	.5000			8	.40	18	.90
9	.5625			9	.45	19	.95
10	.6250			10	.50		

Use of the Table.

Reduce 6468 Marks, 12 Schillings, Hamburg money, into Sterling; Exchange 34s. 6d.

Opposite 34s. 6d. in the Table stands 12.9375 the Marks, and decimal parts of a Mark contained in One Pound Sterling at the said Exchange; divide the given Sum by this value, adding ciphers for each decimal place in the divisor, and if there be schillings in the sum as in the example, look in the Table of the decimal value of

Dutch money to Sterling.

Schillings, and opposite 12 (or the number that may be) will be found their decimal of a Mark, which add or subjoin to the sum of the Marks, and divide the whole by the divisor found in the Table, thus

$$\begin{array}{r}
 \text{Marks.} \\
 6468.0000 \\
 \quad .7500 \text{ Decimal of 12 Schillings.} \\
 \hline
 12.9375 \overline{)6468.7500} (\text{£}500 \\
 \underline{646875}
 \end{array}$$

In business it will generally be found sufficiently exact to take only the two decimal places in the divisor, adding 1 to the second place, if the third is 5 or above it, this will shorten the operation considerably: thus if the Exchange be 34s. $10\frac{1}{2}$, the divisor is 13.0781; instead of this divide by 13.08, adding two ciphers to the sum to be divided as before mentioned.

To find the value of one Mark,

Take from the Table the value of a Pound in Marks at the given Exchange, and divide 240 by it, adding cyphers for the decimal places in the divisor, thus if the Exchange be 34s. 6d. opposite this sum in the Table stands 12.9375 by which divide 240 the number of pence in one Pound, the quotient is the number of pence in one Mark.

$$\begin{array}{r}
 12.9375 \overline{)240.0000} (18.55 \text{ pence.} \\
 \underline{129375} \quad \text{or } 18\frac{1}{2} \text{ pence nearly.} \\
 1106250 \\
 \underline{1035000} \\
 712500 \\
 \underline{646875} \\
 65625 \text{ \&c.}
 \end{array}$$

To Reduce Sterling money to Marks Hamburg,

Take from the Table the value of one Pound in Marks, at the given Exchange, and multiply it by the sum of Pounds Sterling, and take parts for Shillings and Pence.

Table for reducing, &c.

Reduce £542.4.7½ to Hamburg money; Exchange 35s. 4d.

$$\begin{array}{r}
 35s. 4d. = 13.25 \text{ by the Table.} \\
 \underline{542.4.7\frac{1}{2}} \\
 2650 \\
 5300 \\
 6625 \\
 265 \\
 33 \\
 8\frac{1}{4} \\
 \hline
 \text{Marks } 7184.56\frac{1}{4} \\
 16 \\
 \hline
 340 \\
 56 \\
 \hline
 \text{Schillings } 9.00
 \end{array}$$

Florins are reduced to Sterling money, and Sterling money to Florins, by operations similar to those above stated with regard to Marks.

Reduce 5875 Florins to Sterling; Exchange 39s. 2d. per £.

$$\begin{array}{r}
 \text{Florins. } \text{£.} \\
 11.75)5875.00(500 \\
 \underline{5875}
 \end{array}$$

Reduce £500 Sterling to Florins; Exchange 39s. 2d. per £.

$$\begin{array}{r}
 39s. 2d. = 11.75 \text{ by the Table.} \\
 \underline{500} \\
 \text{Florins } 5875.00
 \end{array}$$

To find the value of one Florin.

$$\begin{array}{r}
 \text{Pence} \\
 11.75)240.00(20.42 \\
 \underline{2350} \\
 5000 \\
 4700 \\
 \hline
 300 \text{ \&c.}
